

Examination questions: Safety for Operational Supervisors

Event code: Proefexamen_Engels VOL

Please read the following instructions carefully!

This examination is comprised of **70** multiple-choice questions.

Each question is followed by three possible answers, of which only one is correct.

A maximum of **70** marks can be scored in this examination. Every correct answer scores 1 mark.

You will have passed when you score at least **49** marks.

The maximum time for this examination is **105** minutes.

Requirements:

- these examination questions
- the answer sheet (used to note your answers)
- a pencil and eraser

Directions:

- make sure that you have all the pages in these examination questions
- only use a pencil to enter your answers on the answer sheet
- note your answers under the corresponding question numbers on the answer sheet
- indicate your answer by using your pencil to blacken the appropriate square
- always thoroughly erase any incorrectly entered answer

A multiple-choice question will be regarded as incorrectly answered when:

- the wrong answer has been chosen
- more than one square has been blackened
- no square has been blackened
- a square has not been blackened, but has been marked in some other way

At the end of the examination:

- write or check your name on the answer sheet
- give the supervisor these examination questions and the answer sheet

In the event of any differences in interpretation the original Dutch version of this examination is binding.

1 What does the CE mark on machines mean?

- A They meet the minimum European safety standards.
- B They do not need periodic maintenance in Europe.
- C They can only be used in European countries.

2 What measure can the health and safety inspectorate take?

- A Take away unsafe equipment.
- B Give employees notice of dismissal if they violate the Working Conditions Act (Arbowet).
- C Stop work being done if it sees an unsafe situation.

3 What must the different companies do who work at the same location?

- A Carry out a joint prevention policy if the client requires this.
- B Clearly mark off their respective work areas.
- C Cooperate with the carrying out of health and safety measures.

4 Which task is allocated by law to the prevention adviser?

- A Propose prevention measures.
- B Inspect the hoisting equipment at regular intervals.
- C Make sure personal protective equipment is used.

5 Which countries are bound by the European working-conditions directives?

- A All EU member states.
- B All European companies affiliated with the ADR.
- C All European countries.

6 What is the best way to limit risks?

- A Warning signs.
- B Wear personal protective gear.
- C Eliminate the causes of the risks.

7 What is a Task Risk Analysis (TRA)?

- A A written summary of tasks that can cause risks in a company.
- B A written analysis of risks that can occur while performing risky tasks.
- C A written evaluation of the tasks described in the Risk Analysis (RA).

8 What should you do if a workmate is not working safely?

- A Report the unsafe behaviour to the person in charge.
- B Discuss the unsafe behaviour at the next toolbox meeting.
- C Stop the unsafe behaviour or get someone to stop it.

9 What is a risk analysis?

- A A method to analyse accidents by identifying the risks and causes.
- B A written document that describes all dangers associated with a task or work.
- C An analysis consisting of the identification of the dangers and the determination and evaluation of the risks.

10 What must a superior always do while high-risk activities are being carried out?

- A Be sufficiently present.
- B Extend the permit if the work is going to take longer.
- C Entrust supervision to a specialised colleague.

11 How do accidents happen?

- A By coincidence, they are sudden unexpected incidents.
- B As a result of unsafe actions or unsafe situations.
- C Because they are unique: each case is different, accidents almost never have the same cause.

12 What is at the top of the pyramid that gives a picture of the number of accidents?

- A Accidents without absence from work.
- B Near-misses.
- C Accidents with absence from work,.

13 At which level must the policy to prevent accidents be aimed?

- A To supervisory staff.
- B To employees.
- C To employees, supervisory staff and management.

14 What is an important element in a good accident investigation?

- A Collect all facts and information at the place of the accident.
- B Do not interview witnesses or other parties directly involved.
- C Clear the place of the accident as quickly as possible to prevent new accidents.

15 What is important to remember to do when performing an investigation into an accident?

- A Discuss the final report with the site owner.
- B Record the situation in situ with sketches and drawings.
- C Send the results to the Labour Inspectorate.

16 How can you clarify the consequences of working unsafely?

- A By imposing fines with unsafe behaviour.
- B By regularly giving safety training.
- C By explaining and possibly demonstrating the consequences of accidents .

17 How can people best be protected from dangerous situations?

- A By erecting a barrier.
- B By discussing the situations in a toolbox meeting.
- C By using personal protection equipment.

18 How can you reduce the possible disadvantages of safe behaviour?

- A By fully explaining the disadvantages of safe behaviour in the instructions.
- B By ensuring sufficient time to be able to work safely.
- C By paying premiums for safe behaviour.

19 What are the basic principles for reducing the number of accidents?

- A Give safety training and provide protective equipment.
- B Draw up safety procedures and give instructions.
- C Encourage safe behaviour and reduce unsafe behaviour.

20 Why are safety observations carried out at the workplace?

- A Because it is required by the arbeidsinspectie (Health and Safety Inspectorate) following an accident.
- B Because the Arbowet (Working Conditions Act) prescribes the performance of safety observations by all companies.
- C Because it gives a good insight into the safety conditions at the workplace.

21 What does the Working Conditions Act (Arbowet) say an employee must do?

- A Develop working conditions policy.
- B Use personal protective equipment properly.
- C Organise information and training.

22 Which companies must carry out a risk assessment?

- A All companies.
- B Only companies with more than 10 employees.
- C Only companies with a VCA safety certificate.

23 What is the task of supervisory staff as regards prevention and protection at work?

- A Reporting of incidents and accidents to the insurer.
- B Calculation and analysis of the incidents and accident statistics.
- C Investigation of work accidents and incidents.

24 What is the purpose of a toolbox meeting?

- A To tell employees who is responsible for safety on a project.
- B To ensure no-one works or behaves in an unsafe way.
- C To enable employees to talk about a subject they think is important.

25 What does SCC certification indicate about a company?

- A It indicates that the company complies with the safety-control system by means of safety-observation reports.
- B It indicates that the company registers dangerous situations, and has them certified.
- C It indicates that the company works on SHE management in accordance with the regulations.

26 When should notification be given of general safety regulations?

- A Whenever anyone enters the work area for the first time.
- B Every year, to all the company's permanent employees.
- C At each toolbox meeting.

27 In which situation do you use blind flanges?

- A When shutting off a pipe to a pump that must be disassembled.
- B To control the supply of a product to a pump.
- C To separate liquids into two pipes.

28 For which activities are work permits made?

- A Work involving under 18s.
- B Activities with inherent risks.
- C For activities carried out by accredited external companies.

29 What does this sign mean (white on green)?

- A Emergency exit.
- B Escape route.
- C Assembly point.

30 What must the employment agency emphasize when instructing temporary employees?

- A To be aware of the safety of others during the work.
- B The necessity and the correct use of personal protective equipment (PPE).
- C Keep the employment agency informed of the progress of the job.

31 An employee has checked and signed a work permit. What does this mean?

- A The employee agrees with what the work permit says.
- B The employee has only signed the work permit to say he has received it.
- C The employee is saying he will be the only one doing the work.

32 What are the various phases involved in the control and resolution of an incident?

- A The initial notification of the incident, the classification of the incident, the implementation of measures, and the termination of the incident.
- B The initial notification of the incident, the implementation of measures, and the termination of the incident by means of an aural signal.
- C The initial notification of the incident, the installation of crowd barriers, the notification of the fire brigade, and the termination of the incident.

33 Which of the following is a duty of the company emergency team?

- A To fight beginning fires.
- B To carry out workplace inspections.
- C To give safety courses.

34 What are hazardous substances?

- A Substances that displace oxygen, such as nitrogen.
- B Substances that always have an orange label.
- C Substances that are dangerous to your health.

35 How can a toxic substance immediately enter your blood?

- A By respiration.
- B By digestion.
- C Through an open wound.

36 Which information on the label indicates the risks posed by a specific product?

- A The S phrases.
- B The R phrases.
- C The M phrases.

37 What steps are taken to prevent leaks in an installation?

- A Make sure the work permit is present.
- B Use the compulsory personal protective equipment.
- C Inspect the installation regularly.

38 What do we understand as a chronic effect of a dangerous substance?

- A The effect is clear after approximately three days.
- B The effect is only clear after protracted exposure and repeated exposure.
- C The effect is clear immediately or shortly after exposure.

39 The white section of a hazard diamond is empty. What does this mean?

- A That the product is not dangerous to your health.
- B That the product is radioactive.
- C That, in case of calamities, this substance does not require special treatment.

40 What should you do when you encounter "suspected asbestos" at the workplace?

- A You must immediately invite the arbeidsinspectie (Labour Inspectorate) to come and carry out an inspection.
- B You must contract a specialized company to remove the material.
- C You must have an independent laboratory establish whether the suspected material is in fact asbestos.

41 What do we call the point at which a substance burns without an ignition source?

- A Igniton temperature.
- B Self-ignition temperature.
- C Flash point.

42 Name a disadvantage of CO₂ as an extinguishing agent?

- A It conducts electricity.
- B It causes damage and soiling.
- C It can have a suffocating effect on people.

43 Which sign indicates an area with an explosion risk?

A

B

C

44 What is a safety risk of a fire near to a storage tank containing a combustible substance?

- A The contents of the tank will be heated up.
- B The coating on the tank comes off.
- C The contents of the tank can no longer be sold.

45 How does foam put out a fire?

- A It cuts off the oxygen supply.
- B It displaces the oxygen.
- C It lowers the temperature.

46 Which phenomenon can give rise to an explosion-hazard zone?

- A Steam clouds.
- B Helium clouds.
- C Dust clouds.

47 Which condition must be met when working with a permanently installed drilling machine?

- A The voltage of the machine is less than 50 Volts.
- B You wear goggles.
- C You wear gloves.

48 What must a hand-held grinder be fitted with?

- A A guard around the grinding disc.
- B An earthed plug.
- C A speed limiter.

49 What is meant by the term "lifting equipment"?

- A The accessories which are not fixed to a crane.
- B The components used to make a crane.
- C The jib, pulley and drive.

50 Which is the correct way of working with a chain?

- A When a chain is lengthened, the permissible load must be reduced.
- B The connecting link that is used for the lengthening of a chain must be exactly as strong as the chain itself.
- C A chain may never be lengthened except by the manufacturer.

51 What is an important risk when using tackles?

- A The heavy physical effort for the operator.
- B Breaking of the suspension or attachment point.
- C Toppling of the hoisting appliance.

52 What is a pallet truck?

- A A hand truck that you can slide under pallets to move them by tilting them backwards.
- B A mobile pallet for the movement of boxes and crates.
- C A transport tool with limited lifting height for moving pallets.

53 What radiation is released during electric welding which is extremely harmful to the eyes?

- A Ultraviolet radiation.
- B Gamma radiation.
- C Beta radiation.

54 What constitutes a hazard during demolition work?

- A Falling demolition material.
- B Using waste chutes.
- C Not having sufficient natural ventilation.

55 What are wall openings protected with?

- A A warning signboard.
- B A red-white rope.
- C A trellis.

56 Working with gas cylinders in an excavation can be particularly hazardous. What safety measure do you take?

- A Only place gas cylinders against the wall of the excavation.
- B Never work with gas in or near an excavation.
- C Never place gas cylinders in the excavation.

57 Which of the following is a safety requirement for working on hydraulic platforms?

- A Hydraulic platforms may be used solely by people who have received the necessary instructions.
- B Hydraulic platforms may be used solely by people with sufficient experience.
- C Hydraulic platforms may be used solely by people with a valid driving licence.

58 What is the maximum duration of stay in a confined space?

- A 1 hour.
- B As short as possible.
- C 4 hours.

59 If you are an earth mover, which of the following are you required to report to KLIC/Land registry?

- A The presence of an unknown cable or pipe (orphan line).
- B Discussions between cable and pipeline management bodies.
- C Excavations up to a depth of 50 centimetres.

60 Which of the following determines the strength of an electric current flowing through the body?

- A The amount of moisture on the person's skin.
- B The person's clothing.
- C The person's age.

61 Why fit a differential switch?

- A To be able to lower or raise the voltage depending on the number of connected appliances.
- B To break the current when contact is made with live parts.
- C To prevent the heating up of cables or appliances with overloading.

62 In a builder's junction box, an earth switch is fitted as an added safeguard. What value should such an earth switch have?

- A 70 mA.
- B 50 mA.
- C 30 mA.

63 Which of the following has an influence on the injuries caused by electric current through the human body?

- A The strength of the current passing through the body.
- B The fabric used to make the victim's clothes.
- C The temperature of the room in which the victim is located.

64 Which rule of thumb can be used to estimate when the noise level constitutes a hazard?

- A The level is hazardous when it is impossible to conduct a conversation at a distance of 1 metre without raising the voice.
- B The level is hazardous when it is impossible to conduct a conversation at a distance of 2 metres without raising the voice.
- C The level is hazardous when it is impossible to conduct a conversation at a distance of 1.5 metres without raising the voice.

65 Is a temperature of 21°C throughout the whole company ergonomically optimal?

- A Yes, because everyone has the right to the same temperature.
- B Yes, because 21°C is the ideal temperature for everyone.
- C No, because some carry out heavier physical work than others.

66 When is standing work preferred to seated work?

- A If the pace of work is very high.
- B If there is sufficient leg room.
- C If one must often reach far or high.

67 Why is it necessary to use personal protective equipment?

- A Because this is the right source-related measure.
- B Because this can prevent injury or damage.
- C Because this prevents accidents.

68 What is the maximum protection offered by special cotton-wool ear plugs?

- A 45 dB(A).
- B 10 dB(A).
- C 30 dB(A).

69 What is a special property of a filter mask?

- A This mask can be used with a particle filter or a vapour filter.
- B This mask gives the same protection as a disposable mask.
- C This mask also protects the eyes.

70 What is the most important feature of safety shoes and safety boots?

- A They stop you spraining your ankles.
- B They protect the feet against heavy objects.
- C They protect the feet against damp.
